STANDARD OPERATING PROCEDURE (SOP)
Implementing a Water Share Membership Program

Step 1: Initial Discovery & Business Launch

✅ Watch **Discovery Process** video (overview of the business model, mission, and implementation steps)
✅ **Schedule Business Start-Up Call or Meeting with Silvia** to review goals, setup timeline, and receive personalized guidance

---

Step 2: Order & Set Up Equipment

✅ Order **Enagic K8 or Super501 machine** [Complete QUAD]
✅ Order **Aquaperform filtration system** (use discount link for 5% off)
✅ Order **5-Liter BPA-free bags** from getjohnelliswater.com
✅ Order **half-gallon glass jars** (Amazon or Alibaba)
✅ Order **custom waterproof stickers/labels** for jars from stickeryou.com
✅ Designate a **clean, dedicated area** in the business for:
- Machine setup (near water supply + outlet)
- Storage of empty/filled bags and jars
- Daily sanitization station

Step 3: Prepare Marketing Materials

✅ Print **informational flyers** or **trifold brochures** on hydrogen water benefits (for waiting rooms, counters, or exam rooms)
✅ Print **Water Share Membership Pricing sheets**
✅ Print **Membership Contracts** (1-month renewing, including benefits + instructions for use)
✅ Place **visible signage** at check-in areas and near machines to spark curiosity

---

Step 4: Organize Member Tracking & Payments

✅ Create a **Member Tracking Spreadsheet** (Name, Volume, Daily Pick-Up Log, Notes)
✅ Set up **automated payment system** (Square, Stripe, PayPal, or in-office POS) to bill members on the same day each month
✅ Create a **new member onboarding process**:

- Collect signed membership contract
- Add client to tracking spreadsheet
- Explain daily pick-up procedure and set expectation for weekly check-ins
- Educate on pH ramp-up (8.5 for week 1 → 9.0 for week 2)

Step 5: Daily Operations

✅ Fill water daily (fill 5-L bags or half-gallon jars)
✅ Log each member's pick-up in spreadsheet
✅ Remind clients of the importance of **daily pick-up** (because hydrogen is a gas, it dissipates quickly, so water must be fresh)
✅ Refill returned containers only after proper sanitization (see maintenance)

Step 6: Maintenance of Machines & Containers

✅ Run **e-cleaning cycle with citric acid** on K8 every 1-2 weeks (instructions available on YouTube)
✅ Replace K8 filter when machine advises
✅ Replace Aquaperform filter **once per year** (use 5% discount link)
✅ (Optional) If offering 11.5pH and 2.5pH, stock **Electrolysis Enhancer**
✅ Sanitize returned containers:
- Spray dispenser spout, caps, and mouths of containers with 2.5pH

Step 7: Growth & Lead Generation

✅Weekly Text Check-in: Track upgrade from 8.5 to 9.5pH. Encourage members to share experiences, provide testimonials, referrals
✅Incentivize members to refer a friend for $40 reward

✅Invite to monthly Water Share Workshop/Demo for $40 reward

✅Add to Loaner Unit waiting list

✅Share Ukon Samples and provide Ukon (and Anespa) sell sheets

✅Share 25-minute webclass or invitation to LIVE Masterclass

✅Share Water Share Membership model with other local businesses

✅ Track how many members upgrade to owning a unit (conversion opportunity)
✅ Track how many unit buyers become business partners (long-term passive income

potential)
✅ Schedule **quarterly check-ins** to review growth, troubleshoot, and update marketing
